Education in Emergencies Indicators

Indicator 1

Indicator 1 is the sum of **boys** and **girls** reached with **completed** activities under the indicator *indicator 1 # of children and youth accessing ECD spaces/schools in drought affected areas*.

However, it should be noted that there are a substantial number of men and women reported under indicator 1. Unfortunately, these persons are not counted under the sector reached or the reached by indicator.

Table 1: Adults reported under Indicator 1

county	men	women
Homa Bay	112,000	28,000
Kajiado	4	4
Samburu	38	24
Turkana	15,750	7,900
West Pokot	200	150
Total	127,992	36,078

Indicator 2

Indicator 2 is the sum of **men, women, boys** and **girls** reached with **completed** activities under *indicator 2 # of schools/ECD spaces with feeding programmes*.

Indicator 3

Indicator 3 is the sum of **men, women, boys** and **girls** reached with **completed** activities under *indicator 3 # of learners and teachers reached with learning and teaching materials*.

Indicator 4

Indicator 4 is the sum of **men, women, boys** and **girls** reached with **completed** activities under *indicator 4 # of schools with adequate quantities of safe water for drinking and personal hygiene*.

Indicator 5

Indicator 5 is the sum of **men** and **women** reached with **completed** activities under *indicator 5 # of teachers / educators trained on resilience enhancing programmes (MHPSS, DRR & Life Skills, etc)*.

However, it should be noted that there are a number of girls and boys reported under indicator 5. Unfortunately, these persons are not counted under the sector reached or the reached by indicator.

Table 2: Children reported under Indicator 5

county	boys	girls
Isiolo	74	17
Kilifi	21	39
Kwale	22	22
Mandera	77	8
Marsabit	162	24
Samburu	12	16
Wajir	22	3
West Pokot	2,477	2,618
Total	2,867	2,747

Indicator 6

Indicator 6 is the sum of **boys** and **girls** reached with **completed** activities under *indicator 6 # of children and youth benefiting from resilience enhancing programmes (MHPSS, DRR & Life Skills, etc)*.

There are comparatively few men and women reported under indicator 6. Nevertheless, only children reached count towards this indicator and the sector reached.

Table 3: Adults reported under Indicator 6

county	men	women
Baringo	16	12
Marsabit	46	41
Meru	12	16
Samburu	22	25
Turkana	101	77
Total	197	171

Sector Reached

The sector reached is the sum of persons reached by EiE indicators **1**, **2**, **5** and **6**:

- indicator 1 # of children and youth accessing ECD spaces/schools in drought affected areas
- indicator 2 # of schools/ECD spaces with feeding programmes
- indicator 5 # of teachers / educators trained on resilience enhancing programmes (MHPSS, DRR & Life Skills, etc)
- indicator 6 # of children and youth benefiting from resilience enhancing programmes (MHPSS, DRR & Life Skills, etc)

All earlier conditions still apply i.e. men and women reported under indicator 1 are not counted towards the indicator reached or the sector reached. Only **completed** activities are included.

The rationale for choosing to sum these four indicators for the sector reached is that the likelihood of overlap in beneficiaries between these activities is minimal.

However, for future reference, a more robust form of calculating sector reached would be by summing the highest number of boys, girls, men and women reached across all schools and other institutions with EiE activities. Even more robust would be a beneficiary database, which would go hand in hand with tracking enrolment.
